## I. Overview

Indigenous and local wisdom traditions relied on folktales often about the “wise conduct of life”. Folktales are some of the first lenses we receive through which we see and understand the world.

What might be folktales from the future?

How can we draw on future visions to develop narratives of “being” to guide us through the transition to a regenerative world?

The workshops invite participants to bring together stories from their own personal experience and their imagination of a just and regenerative future. We re-tell these stories by contextualising them in the world of the future by adapting them into different worlds that engage with possible, probable or desirable futures.

### Learning outcome

- ✓ The student is able to formulate long-term oriented visions of a desirable future

## II. Learning Activity

Through two sessions, students engage in the art of crafting folktales, actively shifting existing narratives and creating room for (re)imagining desirable futures.

### 1. Folktales that Shaped us

⌚ 1 hr

Start with exploring how the tales we grew up with influence our identity and understanding of the world. Instruct the students to choose a folktale or story that had a significant impact on them during their childhood and share it with their peers in small groups.

Encourage the students to share their personal experiences and perspectives and to listen actively to their peers during the discussion.

**Tip:** potential questions to guide the discussion are:

- How did the folktale make you feel? What emotions did it evoke?
- What aspects of the folktale had real meaning for you? Why were they important?
- Which character did you relate to the most? Why did you connect with them?
- What lens did you adopt from the folktale to understand the world? How has it shaped your worldview or beliefs?

### 2. Visions of Desirable Futures

⌚ 2,5 hrs

Invite students to pick their favourite character from the folktale in the previous step, using the following guidelines:

Now choose a time in the future, for example, 10, 50 or 100 years from now. Think of a situation that might change in the future. What if there was no waste? What if wars were fought virtually? Ground this change by imagining it concretely in a particular place.

Except where otherwise noted, content on the Transition Makers Toolbox is licensed under a Creative Commons Attribution 4.0 International license. Icons by The Noun Project.

Imagine yourself as this character engaged in this situation in this place. Write or draw what this scene might look like. Think about what the place looks like, what sounds you hear and what it feels like to be there.

### 3. Crafting a Story

⌚ 4 hrs

In accordance with the vision outlined, instruct students to make a journey outline using the following guidelines:

Begin by considering the vision as the endpoint of your story. From there, think about your character's journey from the present to reach that endpoint in the future. What experiences will they encounter? Who are the other significant characters in this story? What pivotal moments, locations, and events will arise along the way? What challenges will the characters face and what must they learn or unlearn to reach the endpoint?

To further craft the story, students fill the outline with a narrative in the form of a folktale. Encourage students to think creatively and critically about the future and draw on storytelling skills.

**Tip:** as a guide, Peter Fruhmann's structure of a folktale can be found under Key Advice.

### 4. Developing a Format

⌚ 4 hrs

The folktales can be developed and shared in multiple forms, depending on the time available, as written stories or oral narratives, comic books or animations, using AI or creating VR scenarios. This can be decided early on or open to choose based on the narrative.

## 5. Sharing Future Folktales

⌚ 30 mins

Invite the students to share the final folktales in the group.

After each presentation, allocate some time for peers to fill in the peer-reflection assessment on the shared folktales. Emphasise the importance of respectful and constructive feedback, focusing on both positive aspects and areas for growth. Next facilitate a discussion where students can share peer feedback.

**Please note**, as part of assessment as learning, students reflect using peer reflective and self-reflective questions.

### III. Assessment

Assessment encourages students to reflect on their own and their peers' folktales, using a set of reflective questions that help them to evaluate their perspectives and the narrative process.

#### **Purpose**

Assessment as learning aims to strengthen the learning process and the development of metacognitive skills. It empowers students to direct their own learning and to become independent, critical self-assessors.

#### **Roles**

Self-assessment and peer-assessment

#### **Characteristics**

Self-regulated learning

#### **Materials**

Reflective questions

## Assessment

### Self-Assessment

Reflect on your folktale by answering these questions:

1. Which specific elements of folktales have helped me to envision a better future for myself and society as a whole?
2. What impact have folktales had on my ability to think beyond my immediate circumstances and consider long-term possibilities for growth and development?
3. How can the lessons and morals from folktales be applied to current societal challenges and contribute to creating a better future for all?
4. What was the most difficult hurdle in building the narrative from the present to the future?

## Peer Assessment

Reflect on your peer's folktale by answering these questions:

1. Do you relate to the desirable future told through this folktale? Why or why not?
2. Does the plot present a plausible pathway to a long-term vision? If yes, how does it do that, if not, what seems to be amiss?
3. What aspects of the narrative do you find most effective and why? What aspects do you find least effective, and what might make it more effective?

## IV. Key Advice

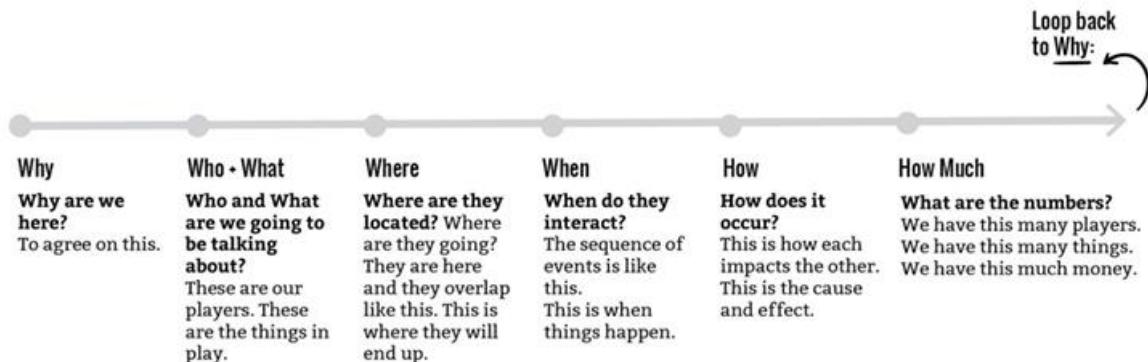

A possible variation of this tool is Collaborative Future making, where participants bring together future visions with local communities. This also allows voices of underrepresented communities to be brought into the discourse and valorised.

### **Peter Fruhmann's structure of a folktale** (Step 3):

- Context – where the characters and setting are explained;
- Turning point – where the problem is introduced;
- Action – where the characters in the story react to the problem;
- Reversal – where more things go wrong and the problem gets worse;
- Resolution – the story's dilemma is resolved and the characters react to that resolution.

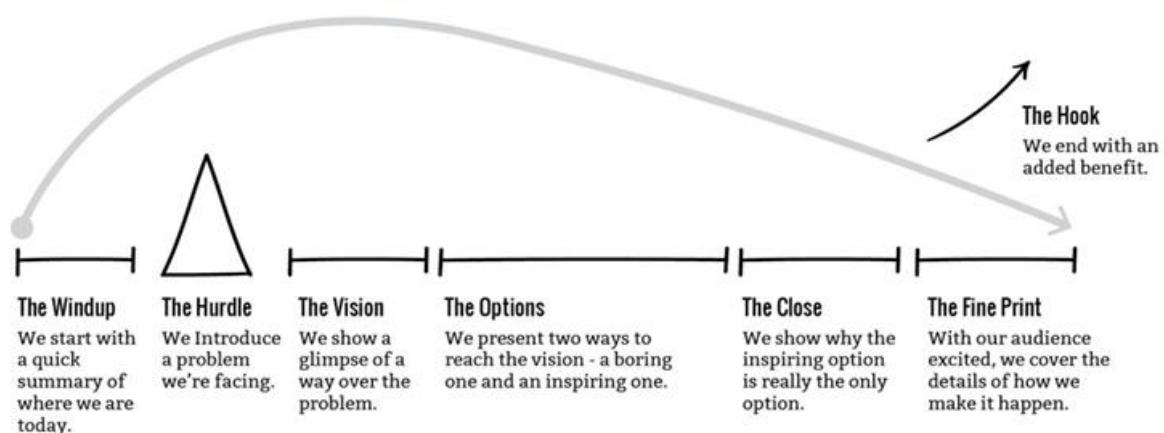

# The Report

# The Explanation

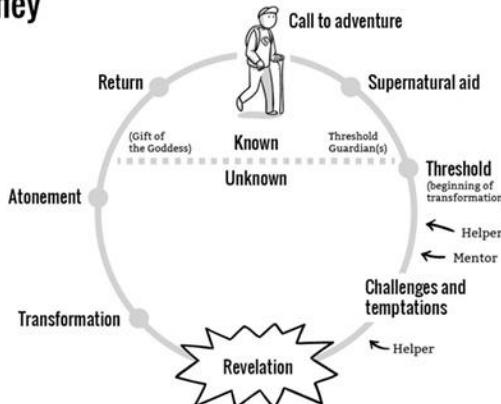

# The Pitch

You can be present in the story, but only as that ally or helper. What Campbell prods us to remember is that it's always the audience who play the hero.
