

Co-Designing Transition Experiments

Use the card deck to refine your transition experiment by exploring it across six key categories. For each category, select one or more questions from the card deck and discuss them. Record any insights or adjustments to your concept. Use the small box at the bottom to revisit a category if the discussion in another area sheds new light on it. Designing a transition experiment is not a linear process, so embrace the flexibility to adapt your thinking as you progress.

 **Supported**  **Radical**  **Feasible**  **Strategic**  **Measurable**  **Mobilising**
