

Key Advice

Guiding questions for Assignment 1 (preparation for the role play)

Write a short paper of max. 1000 words on the transition project. Make use of the selected readings* and make sure you address the following issues:

- Describe in your own words why the transition is needed. What is the overall problem? Make sure that you clearly state the societal relevance and back this up with literature.
- Reflect on the interdisciplinary aspect: what kind of disciplines are related to the transition?
- Make a short analysis of the stakeholders engaged: which organizations are involved? And what kind of professionals within these organizations are involved?
- What are the main tasks of the specific professional or expert you will represent in the role play?**

*The assignment can be adapted for various transitions. The teacher will need to focus on one (or more) transition(s), such as the energy transition, and provide a selection of readings on this topic.

**You will receive key information on specific roles and are also encouraged to search for additional information.
